

Love Your PLANET

In the frozen sea, an orca pops her head up out of a hole in the ice. She breathes as deep as she can as she looks for a new hole, far off.

Imagine That! Wonders of the Natural World, Grade 2

One night, a curious coyote followed her nose through New York City's streets and into a busy tunnel. She wandered through Central Park!

Imagine That! Wonders of the Natural World, Grade 4

The vampire bat quietly lands near a sleeping animal and crawls up to it. She picks out a hairless spot and bites it with her razor-sharp teeth.

Imagine That! Stories, Grade 6

A big wave called a pororoca enters the mouth of the huge Amazon River. It pulls trees and animals off the shore. Surfers jump out in front of it to catch the wave!

Imagine That! Wonders of the Natural World, Grade 4

A grandfather saved his grandson from a hungry anaconda near their jungle farm!

Imagine That! Wonders of the Natural World, Grade 3

The Argentine horned frog has a mouth that stretches as wide as his whole body. With his strong jaws, he will bite anything that comes near him!

Imagine That! Wonders of the Natural World, Grade 5

CELEBRATE EARTH DAY, APRIL 22

Find more fantastic and amazing things about your planet and the people and creatures on it in Imagine That! Stories, a series of high-imagery, high-interest story collections from Gander Publishing.
